Sprayhood

Why choose the C&J Marine Sprayhood?

The answer is evident, the C&J Marine Sprayhood is modern, versatile and above all, innovative. Along with many years of experience, C&J Marine's continuing research, design and manufacturing techniques produce a Sprayhood that is revolutionary. Not only is it the perfect stand-alone product, but it also provides the foundations for further adaptations of C&J Marine top-of-the-range covers that will transform the Sprayhood into a first class multi-functional system.

Providing a robust and sturdy structure to the C&J Marine Sprayhood is the framework; manufactured from a strong, marine-grade, high-quality stainless steel. This framework provides exceptional stability along with the very distinctive C&J Marine profile. Complimenting the already incomparably designed cover and framework, the attachment and tensioning methods utilised are strong, yet controllable. This enables swift and effortless assembly and stowage of the C&J Sprayhood.

Continuing in-depth research into the materials used in the construction of the C&J Marine Sprayhood ensure optimum use, durability and appearance. As well as a product that can be easily maintained and valeted. The highly-advanced materials, in conjunction with modern digital manufacturing techniques, enable C&J Marine to continue to remain leaders in their sector, providing a product of a consistently-superior quality.

Optional Extras

Grab Handles

Extension Options

➤ Sprayhood **Optional Extras**

Roll-away side screens

Winches mounted on the forward ends of the cockpit can also be accommodated. With the option of yet another neat design, roll-away side screens can be incorporated into the Sprayhood, allowing it to remain fully operational. Adjustable attachment methods on the framework enables the sidescreens to be neatly rolled and stowed against the Sprayhood cover, but still allowing full turns on the winches.

Roll-away centre screens

For sailing in warmer climates or for those hot summer days, the cleverly designed C&J Marine roll-away, zipped centre window is ideal. This allows a cool flow of air to be channelled into the cockpit area instead of being diverted over the top of the Sprayhood and away from the cockpit.

Extra windows

The option of inserting extra windows, manufactured from strong clear PVC, into the side panels and sidescreens of C&J Sprayhood will improve the all-round vision, as well as adding more light into the companionway area.

Window covers

To enable protection of the Sprayhood windows as well as blocking out any unwanted light, C&J Marine high-quality window covers are the solution. Keeping the windows covered will prolong the life of the PVC material. When the Sprayhood is used in conjunction with the C&J Marine Cockpit Enclosure, privacy can also be achieved, ideal for those who live aboard or cruise extensively. These covers are manufactured from the same fabric as the Sprayhood and will attach to the outside of the canopy using secure high quality fasteners.

Upgrade frame & deck fittings

C&J Marine's standard Sprayhood design consists of a combination of high quality nylon/stainless steel frame and deck fittings which are more than adequate for their intended purpose. However, for that extra quality, strength and appearance, C&J Marine offer the option of an upgrade to solid stainless steel frame and deck fittings.

➤ Sprayhood **Grab Handles**

It is a well known scenario to grab the rear of the Sprayhood when moving around the cockpit, boarding or going ashore, and as with fabric it can tend to chafe and become dirty. All this is in the past! After lengthy research the C&J Marine Sprayhood Grab Handle was developed to eliminate this problem. Manufactured from the same high quality, marine grade stainless steel as the C&J Marine Sprayhood frames, it can be retro fitted to the rear frame on both old and new Sprayhoods with a cleverly-designed, robust attachment system. Once again C&J Marine has taken product design to the next level. A range of optional extras are available to customise the already incomparable C&J Marine Sprayhood Grab handle to suit your needs.

The C&J Marine Sprayhood Grab Handle standard design consists of a combination of strong nylon/stainless steel standoff and endplug fittings that are more than adequate for their intended purpose. However, for the extra quality, strength and appearance, C&J Marine offer the option of the solid stainless steel standoff and endplug fittings.

Sailing during cold or wet weather can make it difficult to hold onto the bare stainless steel framework as it can be uncomfortable and slippery on the hands. Therefore the option of a high quality, luxurious pearl grey leather covering is available. Not only does it provide an extremely comfortable grip but also gives the C&J Marine Grab Handle optimum appearance.

The Sacrificial Finger Strip is an alternative option, used when the C&J Marine Sprayhood Grab Handle cannot be installed. The finger strip is attached to the rear edge of the Sprayhood cover and is designed to also protect the Sprayhood from wear and chafing. The Finger Strip is available in two material options – either hardwearing, durable PVC available in a wide range of complimentary colours, or a more luxurious pearl grey leather.

➤ Sprayhood **Extension Options**

A C&J Marine Sprayhood installed to your yacht could be the foundation to a whole world of C&J Marine superior products! By simply adding zips to the Sprayhood one or all of the following items could be **attached**:

Cockpit Enclosure

Do you utilise your cockpit area to its full potential? If not, then the C&J Marine Cockpit Enclosure is a must. Not only will it protect you, your crew and the cockpit but it will also give you an invaluable extended living area. Once you have it, you will wonder how you ever lived without it!

Sprayhood Backdrop

There is nothing worse during foul weather than being trapped in the main saloon or cabins with no air circulation and feeling claustrophobic. The C&J Marine Sprayhood Backdrop will eradicate this problem, allowing you to leave your hatch open in all weathers and breathe a little easier. Once in place this will also protect the companionway and all equipment around this area.

Bimini Enclosure

The C&J Bimini Enclosure is the conclusion of combining a separate Bimini sun shade and a separate Cockpit Enclosure into a stylish, functional and practical unit. Using only one set of framework, the versatile Bimini Enclosure is carefully designed to offer the helm protection from the heat of the sun, and when needed, your crew and your cockpit can be sheltered from all types of weather.

Tonneau Cover

If you would like more information about any of these options please contact a C&J Marine representative or refer to individual information sheets which are also available on our website.

The C&J Marine Sprayhood is supplied complete with all the necessary fastenings, step-by-step installation guide and a 12-month warranty against defective workmanship and/or materials.
