

ACRYLIC CANVAS

MARINE SUITABILITY

The Sunbrella Plus collection fulfils every need when it comes to on-board protection for all types of boats. Offering complete protection and optimal durability, Sunbrella is an alternative solution dyed acrylic canvas manufacturer. This collection harbours performance technology that enables the fabrics to stand up to the harshest marine world conditions. Sunbrella fabrics are high in UPF and UV-resistance, protecting them from the elements when used at sea so they remain stunningly vibrant year after year.

WARRANTY – 5 YEARS

The warranty covers abnormal deterioration of the fabric fibre and colour provided there is normal exposure to the sun and atmospheric agents in general.

PU COATED FINISH

The special resin coating adds a barrier layer to the underside of the acrylic canvas increasing its water column rating to 1000mm plus, but naturally reducing air permeability. The PU coating is the most popular of finishes supplied into the marine market, with its main use being Sprayhoods and Enclosures.

PROTECTIVE BARRIER TREATMENT

Sunbrella Plus is mould-resistant and easy to maintain thanks to its resin-based antifungal coating that makes it waterproof. This solution-dyed acrylic fabric offers piqué effects as well as colours references to coordinate with your boat.
